Prepared for prospective clients and procurement teams evaluating Aliwer as a security partner.

About Aliwer

Aliwer LLC is a Texas-based cybersecurity consulting company founded, owned, and operated by Lorenzo Openito. We help small and mid-sized organizations — including regulated businesses in healthcare, finance, legal, and government supply chains — assess their security posture, close gaps, meet compliance requirements, and operate securely day to day.

Leadership

- **Lorenzo Openito** — Founder, Owner & CEO: strategy, client relationships, engagement oversight.
- **Yves Bwansa** — Chief Operating Officer: delivery quality and partner network coordination.

Delivery is extended through a vetted network of independent specialist consultants (security engineers, compliance specialists, cloud architects), screened and engaged per project under independent-contractor agreements.

The Aliwer Method

Assess → Design → Protect → Monitor → Prove

Phase	What happens	What you receive
Assess	Risk & gap assessment against your target framework	Findings report + prioritized roadmap
Design	Controls, policies, and architecture designed for your environment	Control set, policy pack, remediation plan
Protect	Implementation: hardening, identity, cloud, application security	Deployed controls, verified fixes
Monitor	Continuous monitoring and managed detection & response	Alerts, monthly reporting, incident support
Prove	Evidence collection and audit preparation	Audit-ready evidence, certification support

Engagement process

- **1. Free 20-minute discovery consult** — understand your goals and confirm fit (typically scheduled within 12 weeks; faster paths available on request).
- **2. Scoping & fixed proposal** — clear scope, deliverables, timeline, and price before any work begins.
- **3. Delivery** — a named engagement lead, weekly progress updates, and an executive readout.
- **4. Ongoing partnership** — optional managed security retainer and quarterly posture reviews.

Services & Indicative Pricing

Offering	Model	Starting price
Cybersecurity Baseline Review	Fixed scope, one-time	\$499
Security Assessment	Fixed scope, one-time	\$4,500
Compliance Readiness (SOC 2 / ISO 27001 / HIPAA / PCI)	Per engagement	\$12,000
Managed Security (monitoring, MDR, vuln mgmt)	Monthly retainer	\$3,500 / month
Security engineering projects	Project-based	Scoped per project

Ten service practices in total, including risk assessments, penetration testing, cloud security, application security, AI security, identity & access, incident readiness, vendor risk, security awareness, and virtual CISO advisory. Full catalog: aliwers.com/services.

Products

- **BArecord** — AI-powered business communications archive with automated compliance risk scoring, natural-language search, and executive briefings. Early access now; general launch November 7, 2026.
- **SecureDesk** — AI support desk plus security operations monitoring for small teams. Waitlist open; launches November 7, 2026.

Security, Compliance & Data Handling

Our own compliance posture (stated honestly)

Framework	Current status
SOC 2 Type II	In progress — public timeline at aliwers.com/trust/soc2-journey
ISO 27001	In progress
HIPAA	Advisory practice (we prepare clients for HIPAA; we are not a covered entity)
GDPR / CCPA	Privacy program in place

We never claim a certification we have not completed. Our full trust posture — security practices, privacy, AI governance, sub-processors, and responsible disclosure — is published at aliwers.com/trust.

How we handle your data

- Client consultation and engagement data is used solely to deliver services — never sold, never used to train AI models.
- Named sub-processors: Emergent (hosting), Resend (transactional email), Anthropic (AI features in our products).
- Credentials are hashed (bcrypt); sessions are signed and short-lived; all traffic is TLS-encrypted.
- Responsible disclosure program: security@aliwers.com (policy at aliwers.com/trust/vulnerability-disclosure).

How to Get Started

- **Book a free 20-minute consult** — create a client account at aliwers.com and pick a time.
- **Start small** — the \$499 Baseline Review gives you a prioritized top-10 risk list in days.
- **Ask for our security package** — status letter, questionnaire responses, and DPA available under NDA via aliwers.com/contact.
- **Launch offer** — code LAUNCH20: 20% off your first engagement through November 7, 2026.

Pricing shown is an indicative starting point; every engagement is scoped to your size, stack, and target framework. This document is informational and not a contractual offer.
